(a) Prediction from two measurements
two measurements
predicted from x_1 alone
true value
x_2
x_6
x_3
x_5
abundance x_i
abundance x_1 (measured)
(b) Kinks reveal changes in unmonitored species
sp. 2 invades
sp. 6 invades
sp. 4 lost
sp. 5 lost
increasing θ
abundance x_3 (monitored)
abundance x_1 (monitored)
(c) Extinction precedes divergence
asymptote
(divergence)
branch
(sp. 6 absent)
sp. 2 reaches zero first
x_5
x_2
abundance x_i
θ (change of A_{23})
(d) Press responses without pressing
interaction sweep
actual press on sp. 2
slope $\Delta x_j/\Delta x_1$
x_2
x_3
x_5
x_6
